

14-Day TypeScript Roadmap (2 Hours/Day)

Daily Structure

20 min Docs, 70 min Coding, 30 min Exercises, 10 min Revision

Day 1

Intro, setup, basic types: number, string, boolean, any, unknown, void, never. Practice variables.

Day 2

Variables, let/const, type inference, functions, parameters, return types, arrow functions.

Day 3

Objects, nested objects, optional & readonly properties.

Day 4

Arrays, readonly arrays, tuples, array methods.

Day 5

Union types and literal types.

Day 6

Type aliases and interfaces.

Day 7

Classes: constructor, public/private/protected/readonly.

Day 8

Enums.

Day 9

Generics (), generic functions, interfaces.

Day 10

Advanced types: keyof, typeof, assertions, optional chaining, nullish coalescing.

Day 11

Utility types: Partial, Pick, Omit, Record, Required, Readonly.

Day 12

Modules: import/export/default export.

Day 13

Async TypeScript: Promise, async/await, typed API responses.

Day 14

Mini Project: Todo App, Student Management, Library, or Expense Tracker.

Resources

Official Handbook: <https://www.typescriptlang.org/docs/handbook/intro.html>

Playground: <https://www.typescriptlang.org/play>
